

## ACKNOWLEDGEMENTS

This volume is written jointly by Witold Marciszewski, who contributed the introductory and the three subsequent chapters, and Roman Murawski who is the author of the next ones – those concerned with the 19th century and the modern inquiries into formalization, algebraization and mechanization of reasonings. Besides the authors there are other persons, as well as institutions, to whom the book owes its coming into being.

The study which resulted in this volume was carried out in the Historical Section of the research project *Logical Systems and Algorithms for Automatic Testing of Reasoning*, 1986-1990, in which participated nine Polish universities; the project was coordinated by the Department of Logic, Methodology and Philosophy of Science of the Białystok Branch of the University of Warsaw, and supported by the Ministry of Education (some of its results are reported in (Srzednicki (Ed.) 1987)). The major part of the project was focussed on the software for computer-aided theorem proving called Mizar MSE (Multi-Sorted first-order logic with Equality, reported in (Marciszewski 1994a)) due to Dr. Andrzej Trybulec. He and other colleagues deserve a grateful mention for a hands-on experience and theoretical stimulants owed to their collaboration.

The authors are grateful to Professor Ewa Żarnecka-Biały as the main referee of the contributions produced in the Historical Section, and to Professor Olgierd Wojtasiewicz who helped to translate Chapters 2, 3 and 4 into English. Also the organizational assistance of the University Department for Research Administration, run by Mrs. Bożena Sudnik, is sincerely appreciated.

As for the book itself, the authors are indebted to Professor Leszek Nowak for his encouragement, patience, and editorial suggestions. The typesetting and ingenious technical assistance is due to Mr. Jarosław Sokółowski, while Mrs. Halina Jastrzębska Marciszewska put the finishing touches to the volume through proof-reading, the compiling of indexes and references, and typographical refinements.

The authors hope to enjoy comments from benevolently critical Readers. For the purposes of the so hoped discussion, here are the authors' correspondence addresses.

WITOLD MARCISZEWSKI

Professor (ordinary) at the University of Warsaw, Department of Logic, Methodology and Philosophy of Science (Head) in the UW Białystok Branch. Liniarskiego 4 (street), 15-420 Białystok, Poland. E-mail: "witmar@plearn.edu.pl".

ROMAN MURAWSKI

Professor at Adam Mickiewicz University in Poznań, Faculty of Mathematics and Computer Science, Department of Mathematical Logic. Matejki 48/49 (street), 60-769 Poznań, Poland. E-mail: "rmur@pluam11.amu.edu.pl".

Poznań and Białystok, December 1994
