

Subject Index

N.B. Life on Deshima proceeded according to a fixed, regular pattern. For that reason, we have not burdened the subject index with references to annually recurring events, such as the inspections and repairs of the buildings, sampans, and luggage, the court journey, festivals and celebrations. Such references would only produce long lists of numbers. In the case of the commodities and the Chinese junks, we have made an exception. These long lists give at least a statistical impression of the business of the trading post.
