Printed in The Netherlands

To Carol, Christo, Antoinette and Andrew, Lienkie and Martin, and Ané, a complexifying system which has created love, joy, and meaning.

# CONTENTS

Editorial Foreword		xi
Guest Editorial		xvii
Preface		xxvii
Acknowledgments		xxxii
ONE	The Story Behind the Story	1
	1. Medicine and Society	1
	2. Modern Scientific Medicine	2
	3. How Medicine Became a Natural Science	3
	4. The Story of This Book	7
TWO	The Positivistic Natural-Science Paradigm	9
	1. Does Science Have a World-View?	9
	2. From Neo-Aristotelianism to the Natural-Science Paradigm	10
	3. Paradigmatic Monism vs. Paradigmatic Pluralism	12
	4. The Natural-Science Paradigm	14
THREE	Biomedicine: The Nature of Positivist Medicine	21
	1. The Clinical Method	22
	2. The Social Structure of Biomedicine	25
	3. Biomedical Epistemology	29
FOUR	The Limitations of Positivist Medicine	33
	1. Problems Associated with Modern Scientific Medicine	33
	2. The Limitations of the Biomedical Model	35
	3. Overcoming the Limitations: Redefining Science	37

	4. Overcoming the Limitations: The Fundamental Requirements	42
FIVE	A Comprehensive Model of Science	45
	1. The Meta-Theoretical Dimension of Science	46
	2. The Paradigmatic Level of the Scientific Enterprise	47
	3. The Disciplinary Research Process	49
	4. Reporting and Application	52
	5. Pure and Applied Science	52
	6. Pain and the Rich Texture of Reality	54
SIX	What Is Reality?	59
	1. The Need for an Adequate Ontology	59
	2. Natural Science and Ontology	60
	3. Central Concepts in a New Ontology of Science	65
	4. New-Paradigm Thinking in Science	68
SEVEN	Reality Is a Complex System	71
	1. Self-Organization and Representation in Complex Systems	72
	2. Autopoiesis and Life as a Complex System	75
	3. A Systems Ontology: Self-Organization Across Ontological Gaps	75
EIGHT	What Is Consciousness?	83
	1. What Is the Problem of Consciousness?	84
	2. The Classical Approaches	85
	3. A Third Possibility?	91
	4. Requirements for an Evolutionary View of Consciousness	92
	5. What Consciousness Is Not	93
	6. Artificial Intelligence Research	95

*Contents*

ix

NINE	Consciousness Is Sensation	97
	1. Open and Closed Behavioral Programs	97
	2. Consciousness as an Evolving Phenomenon	98
	3. Consciousness as “Inner Experience”	99
	4. Generating Consciousness	102
	5. Consciousness as Quantum Coherence at Micro-Tubular Level	102
	6. The Problem of the Qualitative Gap	103
TEN	And the Flesh Became Mind: Toward an Evolutionary Systems-View of Conscious Animals	107
	1. Life as Awareness	107
	2. From Sensing to Sensation	112
	3. From Sensation to Self-Consciousness	114
	4. And the Flesh Became Mind	118
ELEVEN	Matter, Mind, and Morals	119
	1. Science and Values	120
	2. Moral Discourse and Open Behavioral Programs	122
	3. Relationships Matter	124
TWELVE	From Sensation to Clinical Method	127
	1. Integrating the Argument	127
	2. Two Case Studies and Two Stories	133
	3. Entering the World of the Patient	139
	References	141
