

PSEUDOSCORPIONS

A NEW SERIES

Synopses of the British Fauna

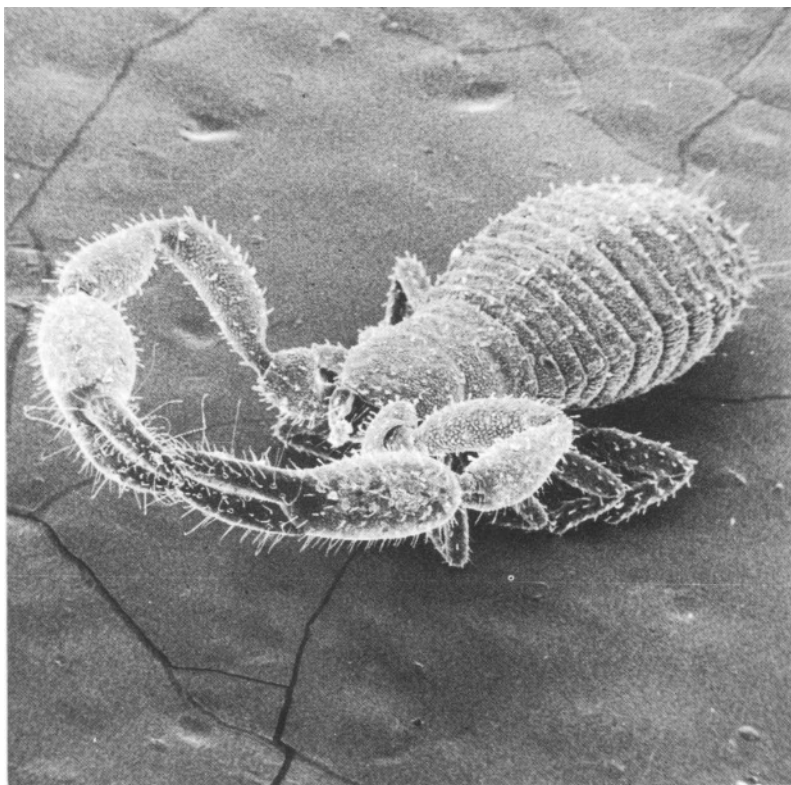

Edited by Doris M. Kermack AND R. S. K. Barnes

The *Synopses of the British Fauna* are illustrated field and laboratory pocket-books designed to meet the needs of amateur and professional naturalists from sixth-form level upwards. Each volume presents a more detailed account of a group of animals than is found in most field-guides and bridges the gap between the popular guide and more specialist monographs and treatises. Technical terms are kept to a minimum and the books are therefore intelligible to readers with no previous knowledge of the group concerned.

Volumes 1–28 inclusive are available from the Linnean Society of London, Burlington House, Piccadilly, London W1V 0LQ.

All subsequent volumes, second editions and revisions may be obtained from E. J. Brill, Publishing Company, Leiden, The Netherlands. All volumes in print are available from Natural History Book Service, Totnes, Devon TQ9 5XN.
