

Wood Structure in Biological and Technological Research

LEIDEN BOTANICAL SERIES

No. 3

This book can be cited as:

P. Baas, A. J. Bolton, & D. M. Catling (eds.) 1976. Wood Structure in Biological and Technological Research. Leiden University Press (Leiden Botanical Series No. 3) 280 pp., 28 Fig., 25 Plates.

In the Leiden Botanical Series will be published papers of a monographic nature from the entire field of botany (including its history, bibliography, and biography) which by their length (100 printed pages or more) are unsuitable for publication in journals. Information can be obtained from the editors, Rijksherbarium, Schelpenkade 6, Leiden, The Netherlands.

Wood Structure in Biological and Technological Research

Edited by

P. BAAS, Rijksherbarium, Leiden, The Netherlands

A. J. BOLTON, Department of Forestry and Wood Science, Bangor, Great Britain

D. M. CATLING, Metropolitan Police Forensic Science Laboratory, London,
Great Britain

1976

LEIDEN UNIVERSITY PRESS

ISBN 90.6021.302.5

No part of this book may be reproduced in any form, by print, photoprint, microfilm or any other means, without written permission from the publisher.

Printed in the Netherlands by Intercontinental Graphics.

Photoset in Malta by Interprint (Malta) Ltd.

CONTENTS

Preface	vi
METCALFE, C. R. History of the Jodrell Laboratory as a centre for systematic anatomy	1
VLIET, G. J. C. M. VAN. Wood anatomy of the Rhizophoraceae	20
BARETTA-KUIPERS, T. Comparative wood anatomy of Bonnetiaceae, Theaceae and Guttiferae	76
BRAZIER, J. D. Observations on some anatomical features used in identification and taxonomy	102
WELLE, B. J. H. TER. Silica grains in woody plants of the Neotropics, especially Surinam	107
CUTLER, D. F. Variation in root wood anatomy	143
BAAS, P. Some functional and adaptive aspects of vessel member morphology . .	157
OUTER, R. W. DEN & W. L. H. VAN VEENENDAAL. Variation in wood anatomy of species with a distribution covering both rain forest and savanna areas of the Ivory Coast, West-Africa	182
KOEK-NOORMAN, J. & B. J. H. TER WELLE. The anatomy of branch abscission layers in <i>Perebea mollis</i> and <i>Naucleopsis guianensis</i> (Castilleae, Moraceae)	196
DENNE, M. P. Wood production and structure in relation to bud activity in some softwood and hardwood species	204
FORD, E. D. & A. W. ROBARDS. Short term variation in tracheid development in the early wood of <i>Picea sitchensis</i>	212
BOLTON, A. J. Biological implications of a model describing liquid flow through conifer wood	222
DINWOODIE, J. M. Causes of brashness in timber	238
JERONIMIDES, G. The fracture behaviour of wood in relation to its structure .	253
LAMING, P. B. Some anatomical and physical aspects of wood-plastic (pMMA) combination of spruce	266
