
The companion compact discs

High quality recordings of the songs of all 170 species of Orthoptera included in this book are available in a companion boxed set of two compact discs entitled *A sound guide to the grasshoppers and crickets of western Europe*. Also included on the discs are the songs (described in Chapter 10) of four cicadas, two toads and five birds, all of which could be confused with the songs of Orthoptera. The discs include a total of 352 song excerpts, with a playing time of 120 minutes.
