

ACKNOWLEDGMENTS

I am indebted to many people for helping me write this book. My colleagues and friends in Mexico City, Washington and New York, including most notably, Guillermo Aguilar Alvarez, José Aragonés, Eloy Barbará, Charles Buderer, Alfonso Cervantes Sanchez Navarro, Leonard Condon, Miguel B. de Erice, Miguel Estrada Marti, Jaime E. Fernández, Kenneth Frieburg, Marisol Govea, Monica Jara Hernández, John Jensik, Javier Jiménez Gutierrez, Santiago Gonzalez Luna, James B. Lynch, Mark H. O'Donoghue, Keith Palzer, Pedro Pesqueira Villegas, Antonio M. Prida, Santiago Rabassa, Rebecca Reese, Ingrid E. Rossi Hansberg, Eduardo Ruiz Vega, Carla Sbert Carlsson, Miguel I. Estrada Sámano, José Alberto Tamayo Valenzuela, and Ya-Ting Yang all proved invaluable in helping me understand Mexican law or NAFTA. In addition, I also want to thank several members of the international press corps in Mexico City for help in understanding the complex and, at times, murky political events in Mexico during my stay there, including Michael Tangeman, Margaret Hooks, Hayes Ferguson, Kate Sheehy, and, especially, Mark Stevenson, who was the first true believer in this project. I also want to extend a special thanks to Alexander C. Hoagland, Jr., Georges R. Delaume and George Kahale, III, all of whose encouragement was invaluable throughout the arduous process of writing this book.

Many people also spent many hours helping me to type, edit and research this book, including Elizabeth Gómez and Isela Rueda Marquez in Mexico, and Nancy DeBuccio, Robert December, Sheila Doherty, Arsene Eglis, Gary Jaskula, Matt McCann, Vita Morales, Peter Peril, and Janet Tidwell in New York.

I also want to thank the members of my family, including my father, Arthur, and mother, Joan, my wife, Jan, and my children, Mack and Frank, for each encouraging me in their own way to persevere with this task.

Although I fully accept the responsibilities for this book's inadequacies, it greatly benefited from the assistance of all who helped me.

Philip T. von Mehren
