

ACKNOWLEDGEMENTS

This work is a revised version of the 1987 Leiden University dissertation written under supervision of Prof. R. S. P. Beekes, whose constant support and scholarly advice were of invaluable help to me.

I am indebted to Prof. F. H. H. Kortlandt for the basic idea of this study and for his comments on the various stages of the manuscript.

I am also indebted to Prof. C. J. Ruijgh for his extensive comments on the Greek chapter of the book.

I am happy to acknowledge my heartfelt gratitude to all those mentioned.
