

Acknowledgements

I AM glad to have been given the opportunity to thank the many people who have made the publication of my late husband's thesis possible.

To Mr Wieder of the House of Brill for the high quality of publication; and to Dr. van Donzel of Leiden for seeing the work through the press.

To Mr Jordan and Mr Simmons for the sympathetic interest which they have shown in something that was more than a simple business transaction and to the late Mr Bowen for his unfailing generosity in time and scholarship whilst the thesis was being written.

Lastly to Professor Lewis who has at all times been available for consultation and encouragement.

To these people, my thanks.
