

ACKNOWLEDGEMENTS

The transcription of Book II was made possible by a *Promotionsstipendium* from the Free University in Berlin for Tanja Kupke, who spent a term at The University of Calgary to accomplish this task.

Benjamin Garstad lent assistance with collating, proofreading, and the indexing of proper names for Book I. He also located many of the sources, and supplied the note on Ganymede, aided by funds from the federal government of Canada and the province of Alberta.

Appendix I was written by Tanja Kupke and presented at the Eleventh Symposium of the Onderzoekschool Mediëvistiek on the subject of Encyclopedic Literature in the Middle Ages, held at Vught, Netherlands, June 1-3 1995, to which both authors were invited.

The collation of the two MSS and the completion of the edition was assisted by a sabbatical leave from The University of Calgary.

I would like to thank in particular Stift Zwettl and the Librarian of the *Stiftsbibliothek*, Frau Dr. Charlotte Ziegler, whose valuable advice on palaeographical matters is very much in evidence in the Notes on the Zwettl Manuscript. Leonard Curchin of Waterloo University kindly supplied the conjecture <Oli>siponem (p. 99), thereby solving the same textual problem in Remigius and Johannes Scottus Eriugena. The editor of this series, Prof. Dr. P.G. Schmidt, again provided many valuable corrections, suggestions and additions.
