

Keyword index

A

administration method – 54
 aggression behaviour – 240
 albumin – 134
 Aleutian disease – 196
 Aleutian mink disease virus – 131
 American mink – 209, 360, 368
 amino acids – 47
 ammonia – 106
 animal welfare – 350, 376, 433, 441, 455, 460, 469
 – measures – 433
 antimicrobials – 165
 appropriate behaviour – 448
 Arctic fox – 84
 assessment of welfare – 360
 astrovirus – 146
 autopsy – 336

B

BAC-NGS – 209
 behaviour – 246, 315, 328, 360, 396
 betaine – 121
 bite – 336
 – mark – 240, 350, 386
 – wounds – 350
 black spots – 386
 blue fox (*Alopex lagopus*) – 25, 229, 441
 body
 – condition – 270
 – length – 261
 – size measurements – 275
 Borellia – 194
 brain – 294
 breeding – 134

C

cage
 – climbing – 103
 – standard – 103
 – types – 328
 carnivore – 91
 CO₂ production – 54

cognitive enrichment – 360
 color – 286
 – mutation – 246, 294, 396
 control method – 196
 correlation – 253

D

defects – 404
 diagnostics – 194
 diarrhea – 146
 diet – 112
 digestibility coefficient – 112
 digging – 376
 diseases – 190, 441
 DNA extraction – 131
 dopamine – 294
 drinking water – 341

E

early life nutrition – 40
E. coli – 165
 embryonic diapause – 223
 emotional state – 448
 energy
 – expenditure – 54
 – metabolism – 40
 environment – 106
 erythrocytes – 32
 evolution – 286
 expert opinion – 460

F

F2-design – 216
 faeces – 381
 farm – 368
 fat deposition – 69
 fatty liver – 32
 – disease – 190
 FCM – 360
 faeces – 106
 fear – 396
 feasibility of welfare measures – 411
 feeding – 177
 feral – 368
 feral mink – 236

Index

fox – 84, 87, 172, 460

– farming – 433

frequency – 253

fur

– bearing animals – 84

– characteristic – 25

– chewing – 350, 426

– farming – 177, 448, 455

genome sequencing project – 209

γ-globulin – 134

greasy kits syndrome – 146

group housing – 103, 350

growth – 280

– hormone gene – 236

– performance – 25

guard hair – 216

H

hair coat – 404

health – 441

hemorrhagic pneumonia – 157

heritability – 253

histology – 404

human-animal relationship – 448

hypothalamic-pituitary-adrenal (HPA)-axis
– 315

I

immunobiochemical parameters of blood –
172

inbreeding – 305

index of concordance – 469

infection rate – 194

influenza A virus – 186

influenza virus – 153

integumentary system – 404

K

Kappa – 469

keeping – 177

killing practice – 455

kit losses – 280

krill meal – 19

L

LC-MS – 121

lecithin – 121

leucocytes – 32

litter size – 270

live weight – 261

low protein

– diet – 47

low-protein – 25

M

mammary nipples – 280

management – 426

maternal diet – 69

maturation hair – 386

medication – 186

metabolic programming – 40

microsatellites – 216

mink – 47, 84, 103, 153, 157, 165, 186, 190,
240, 286, 300, 396, 404, 426, 460

– farm – 305

– *Mustela vison* – 315, 386

– production – 63

mortality – 103, 180, 186

– rate – 32

motivation – 376

multicriteria evaluation – 460

N

Neovison *vison* – 190, 261, 315, 411, 469

nipple dots – 280

noradrenaline – 294

nursing sickness – 341

O

obese – 63

overall assessment – 460

paw imprint – 368
 pelt traits – 253
 phosphatidylcholine – 121
 placement – 328
 placental scars – 270
 plasmacytosis – 180
 pneumonitis – 180
 polyamines – 223
 post-weaning growth – 40
 premise – 196
 prevention – 177
 pre-weaning – 146
 primiparous and multiparous females – 267
 promotor region – 300
 protein – 69
 – provision – 40
 – sources – 19
Pseudomonas aeruginosa – 157
 pulsed field gel electrophoresis – 157
 putrescine – 223

Q

quantitative collection – 91

R

ranch mink – 236
 random amplified polymorphic DNA – 229
 raw egg – 19
 recovery rate – 91
 regulation – 223
 relatedness – 305
 reliability – 411
 reproduction – 87
 resisitant bacteria – 165
 resistance – 134
 restless kits – 341

S

sable – 286, 396
 saliva licking – 341
 salmon by-products – 19
 salmonellosis – 172
 samples – 131

scanbrown and mahogany color types – 267
 seal – 286
 seasonal variation – 381
 selection – 134, 261
 – pressure – 275
 self-biting – 229
 serology – 180
 serotin – 294
 sex differentiation – 275
 silver fox – 441
 size traits – 253
 skin – 404
 – length – 47
 – quality – 47, 84
 slurry chanel – 381
 SNP – 209, 300
 social genetic – 240
 stable isotopes – 54
Staphylococcus – 165
 stereotypies – 426
 storage
 – temperature – 97
 – time – 97
 stress – 315
 strict carnivore – 112
 subjective score – 63
 succinic acid – 84, 172
 synthetic amino acids – 97
