

# Brill EBA

## Evidence Based Acquisition

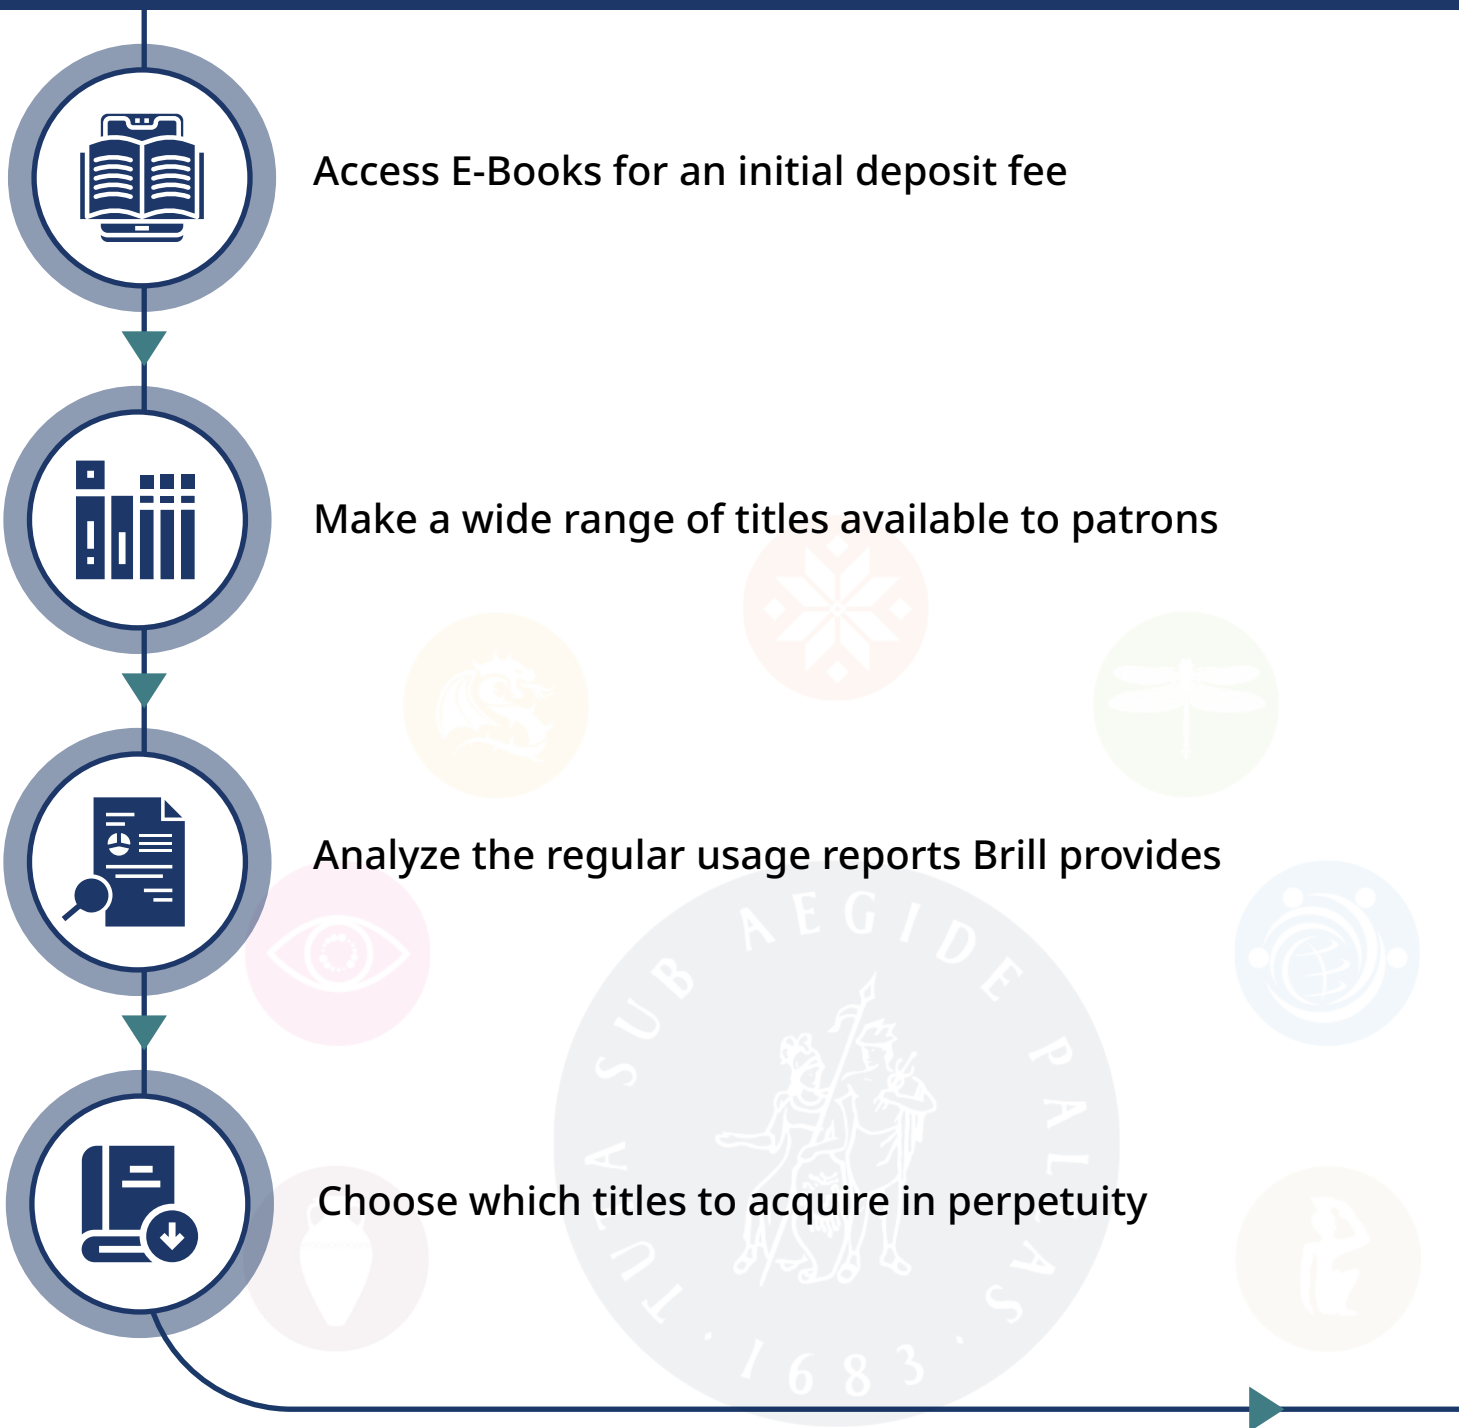

---

Access when and where your users need it,  
with maximum flexibility

# Brill's Evidence Based Acquisition model for E-Books is designed to enable librarians to make data-driven purchase decisions

---

# Brill has over 22,000 E-Books including titles in:

Humanities

Biology

Social Sciences

International Law

With the EBA model, librarians can make a broad range of Brill titles accessible to their patrons

Tailor by:

Subject area

Collection

Imprint

Or simply choose the entire EBA collection!

## You can start your EBA at any time!

Access is set up for the period of **agreement** against a **predetermined budget**

Brill works with institutions to carve out an option that **works for their specific needs**

6 Months

12 Months

Multi-year

## Brill's EBA model brings several benefits

---

### Unlimited site licenses:

This means that one title can be **accessed by multiple users** at the same time

### Usage reports:

COUNTER reports are shared periodically with librarians and give **clear insight** into which titles have been **most popularly accessed**

### Metadata records:

MARC records and KBART files are regularly provided to **enhance the institutional library catalogue**

### Indexing:

E-Books are **indexed** at chapter level by **Google Scholar**

### Discovery service:

Brill EBA includes **data flows** to major **discovery service providers**

## At the end of the EBA period

---

**E-Books of choice** can be acquired in perpetuity

**Boost e-resources**  
simply and smoothly

---

Save time and money  
with **Brill EBA**
