

The pattern of hippocampal neuronal, LTP and unilateral labyrinthectomy in male rats: the role of exercise and curcumin

N. Khalaji, G. Aminpour, B. Pourheydar, N. Abdollahzade, H. Parsaie and L. Derafshpour

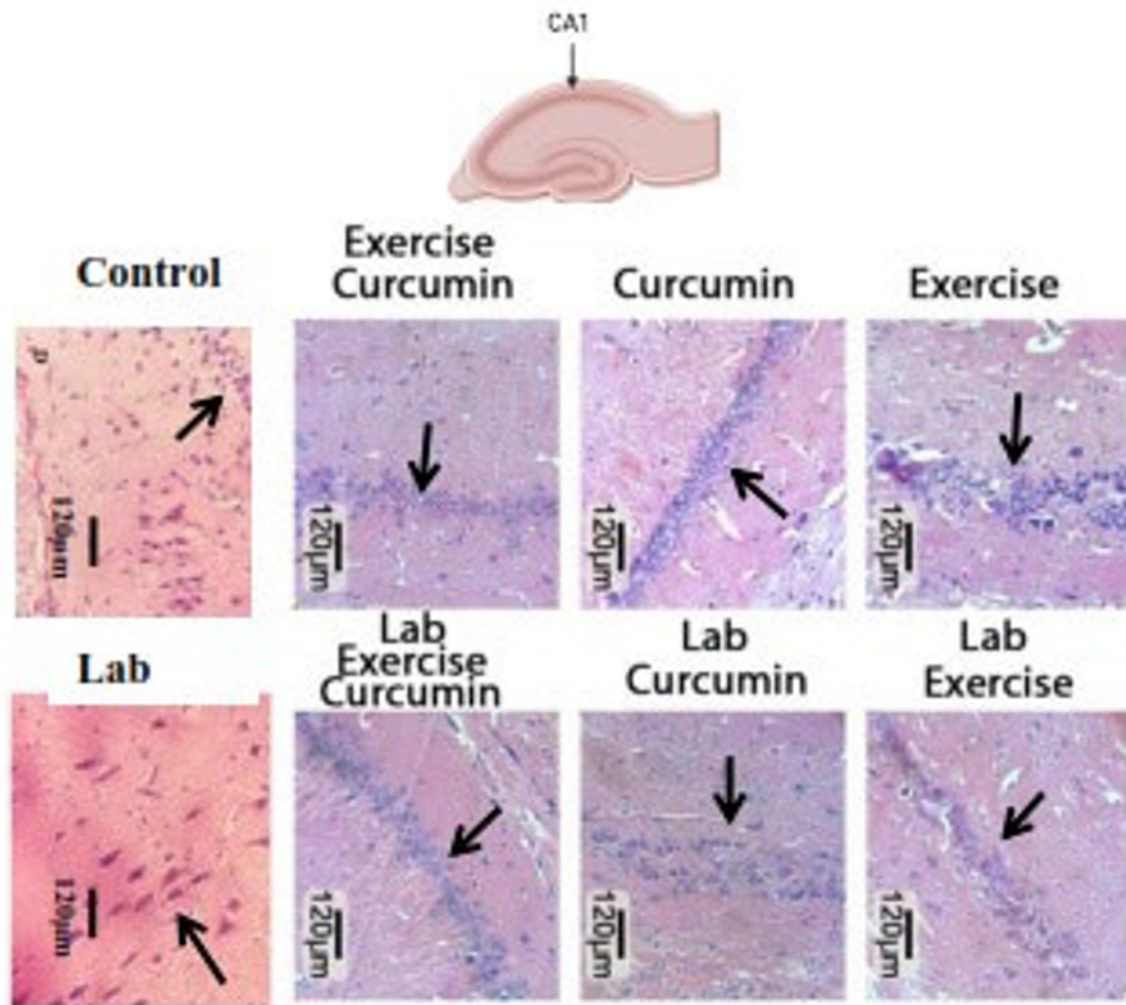

Figure S1. Light microscopy pictures showing Cresyl violet stained viable neurons in the hippocampal regions in experimental groups.

The arrow shows the pyramidal cells of the hippocampus CA1 area. Hippocampus illustration was created in BioRender.com.
